

SPECTRUM SPORTS INTL

V2 ULTIMATE BUNGEE COMBO

The **V2 Combo** adds 2 Ultimate Bungee jump stations behind the climbing wall for tremendous entertainment value and revenue generating potential. It is compatible with all Spectrum Sports Intl models except the Ridgeline 2-Climber.

The Ultimate Bungee brand stands for fast and easy setup and automated jumper management. These benefits are achieved without sacrificing jump quality.

Powering the V2 Combo is our proprietary **Jump Pump**. This system replaces the electric winches found on most other bungee trampolines and automates the management of the jumper's height. Utilizing this system one operator can manage both jump stations.

The A-frame design folds forward as you lower the climbing wall for compact storage on the trailer with minimal assembly. Everything is self-contained. Up your game with this profitable combo!
